

1. Dusk to Dawn (D2D)

If time is set to 'D2D', the controller works in dusk to dawn mode.

2. Transport Mode

2.1 Enter the transport mode

Press the '**Test**' and the controller will enter the transport mode.

 When the controller enters the transport mode, the green LED will be off, and the red LED will flash (0.2s on/5s off).

2.2 Turn on/off the load

When the controller enters the transportation mode, you can turn on or turn off the load by pressing the '**Test**'.

2.3 Exit the transport mode

After the load is correctly connected and the controller is connected to the solar panel for more than 1 second in the daytime, the transportation mode will be over, the load is turned on for 30 seconds, then the controller works normally.

 After setting the parameters successfully, the indicator light and load will turn off for 1 second, then turn on for 3 seconds, and then return to normal operation.
